There are different kinds of citizens in the world. These are not equal. Beside the Islamic states the worst is if you were from Africa. There are others consequently who are above states and nations. They are the new rulers of the world who make the rich more rich and the poor more desperate. The gap is so big that the only solution left is to “clean” the world poverty. Let kill them local wars or rulers or HIV/AIDS or their own hunger. They have to go...they inhabit a continent that is too rich to let them enjoy. These treasures like gold, uranium, diamond, platinum or oil has to serve as a covering asset for the US dollar or EURO or to support the Chinese economical boom or serve as a logistic base of different local wars in the Middle East etc. So blacks.... after being used to build up foreign countries as slaves and your treasures have been robbed...and after different countries put their flags on your lands while your flags were never blown by other winds than the one coming from the savannas and forests...so blacks in Africa...there is no place for you in the new world order. Now you developed world.... Maybe the gap between you and these underdeveloped areas is growing but you gradually are losing something that these blacks still have: the human values.... Maybe we should put together the development and the human values and the result will be better for all of us.

## I. YOUR INTERNAL ENVIRONMENT

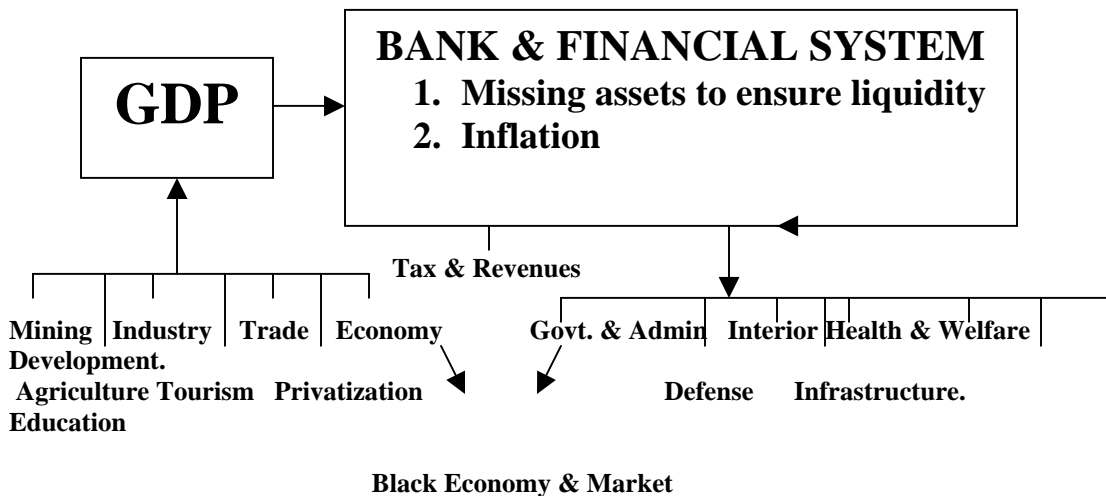

To be measured by GDP (Gross Domestic Product)

The GDP gives a rough idea about the status of your country in terms of economical development and level of living etc. The GDP means the total value of products and incomes on annual base ,but who is giving value for the goods and minerals and services? If there was no local market – and in Africa there is no local market – the values were given by those who are not in Africa. E.g. 1-carat diamond in Mbuji-mayi in the forest (DRC) is 80 USD. The same 1-carat in Johannesburg is 500 USD and 1300 USD in

Amsterdam, Netherlands. The same phenomenon can be observed with other products and goods. Why are the African goods under evaluated? Because there is no local market in Africa. The colonial system killed local markets however the markets today are in the hands of a limited number of groups “illuminates” who are out of Africa. In order to survive you have to steal and smuggle the goods from your own country otherwise you can die of hunger on top of hills of diamonds and gold. Who is the thief? Are you the one who creates this situation? If you are not doing it your leaders do it in a larger scale. Are they thieves? Yes, they are...but they are under pressure in order to keep their chair. Has anything changed comparing to the colonial times? Yes.... The situation is worse. We whites were killing you and robbing you....but we could never imagine that you are so good student to learn everything from us...and even more. And today you blacks are massacring and robbing your fellow blacks drastically...so why we whites should go there while you make the dirty job and everything comes out free of charge to our markets? And your countries become more desperate every day...and there are those who are very happy for that...what is next?

The internal balance between the production and consumption

Your GDP enters your banking system and your budget distributes it in order to keep alive your administrative system and health & welfare and education and infrastructure and police and army etc. If the economy was working properly and there was liquidity in the financing system the banks and the monetary system could maintain balance between those disciplines, which are producing the GDP, and those that are consuming it. In this optimal case you have nice services at your hospitals and your children can be educated in high schools and your police and army can defend you...but there is no interest like that. In fact there is another interest to keep you ignorant not to understand what is going on with you so the finance is taken out of the education...in order to keep you weak and sick they let HIV/AIDS or Ebola or malaria kill you...No money for health & welfare...no money for development and no money for maintaining infrastructures and no money to defend yourself. If you put the map of Ebola or other epidemical diseases or

local wars together with the map of the gold and diamond and other minerals the two maps are coincidentally covering each other.

What about the peacekeepers of UN and others? No...they are not peacekeepers in fact they are war keepers and are assisting to rob the countries...

Questions:

Do you understand why you are starving while you have all the resources that can provide for you to live a high standard life? Do you understand why is the prospect of life or the vision of the future is destroyed in your country? Do you think you are a thief if you steal when a loaf of bread in your country is cca. 0.3 USD and your salary is 10-20 USD? In case the economy was working for the sake of your own people on the base of your resources your salary should be cca. 5000 USD. Do you know where is the missing 4990 USD difference?

What about your money? Every banknote is a stakes. In case you had some banknotes you were a stakeholder. The value of the banknote depends on the productivity of your economy and the assets e.g. gold. What should cover the value of the notes in the circulation. In case the asset (gold) disappears or the balance between the production and consumption was disharmonies or the goods or the money disappear from the market due to the accumulation and manipulation will start the inflation and the liquidity of your money will go down. With the exception of the Rand, which is the official money of the Republic of South Africa, there is no liquid money in Africa. Think about this...Why? Black markets... In order to survive you have to change your hard currency in the black market where the regulations of the offers and requirements are working relatively normally. If you changed your money officially you can get sometimes 20% of the market value. Why? See the answer about the liquidity before... Even if you were going to purchase your daily grocery should use the black market, too. Why? Because the goods are disappearing from the shops. No mealie meal no sugar no flour no fuel etc. due to the accumulation and manipulation. Besides local people, some immigrants run the black market. In the francophone areas Lebanese (DRC) or Senegalese and in the English speaking areas Nigerians and Arabs and some Asian groups are dominating. These groups are controlling shops and businesses and they obviously involve local politicians too into their activity or in fact the politicians are using them. That is why basic commodities disappear from the market daily and that is why the amount of the circulating local money changes day by day. After converting their earnings into gold or hard currency they never return this money to the issuing bank. This is another factor that destroys liquidity and causes inflation. In case politics and criminals work together, we don't speak about simple criminals but in fact mafias. These immigrant groups together with local "untouchables" are ruling the African black economy using national or religious cover. They own buildings and streets and cities...and you my black brother are begging for job or livelihood from them and as a result they treat you as slaves in your own land.

Question:

Have you experienced problems or clashes between tribes or political parties or religious groups in your country? I know...yes...have you experienced any clash or pogrom clearing up those mafias who are controlling business life and black market in your land?

If not then why not?

However the real big fishes are coming now...listen...

## II. YOUR INTERNATIONAL ENVIRONMENT

### Part One: Western Approach...Illuminates

The real big fishes are those illuminates who are globalizing the world and are constructing the new world order. No...it is not true that USA or the Jews or the western states are concerned...the illuminates are above these states and nations. It is true that Jewish or American groups are involved but the simple Americans and Jews as nations are innocent and are respectable citizens of our Globe. On the other hand Arab and other Muslim groups are also members in this invisible rulership...so we Muslims also can be charged too.

Did you know that the economics of the USA suffers from deficit? Do you know that which bank is providing credit to an extent of billions of dollars per annum to maintain the balance of the budget in the USA? This is the Federal State Resources what is a private bank. In other words the economy of USA is in the hand of private groups like Rockefellers and Rotchildes and Morgans and Wartburgs and Bushes etc...

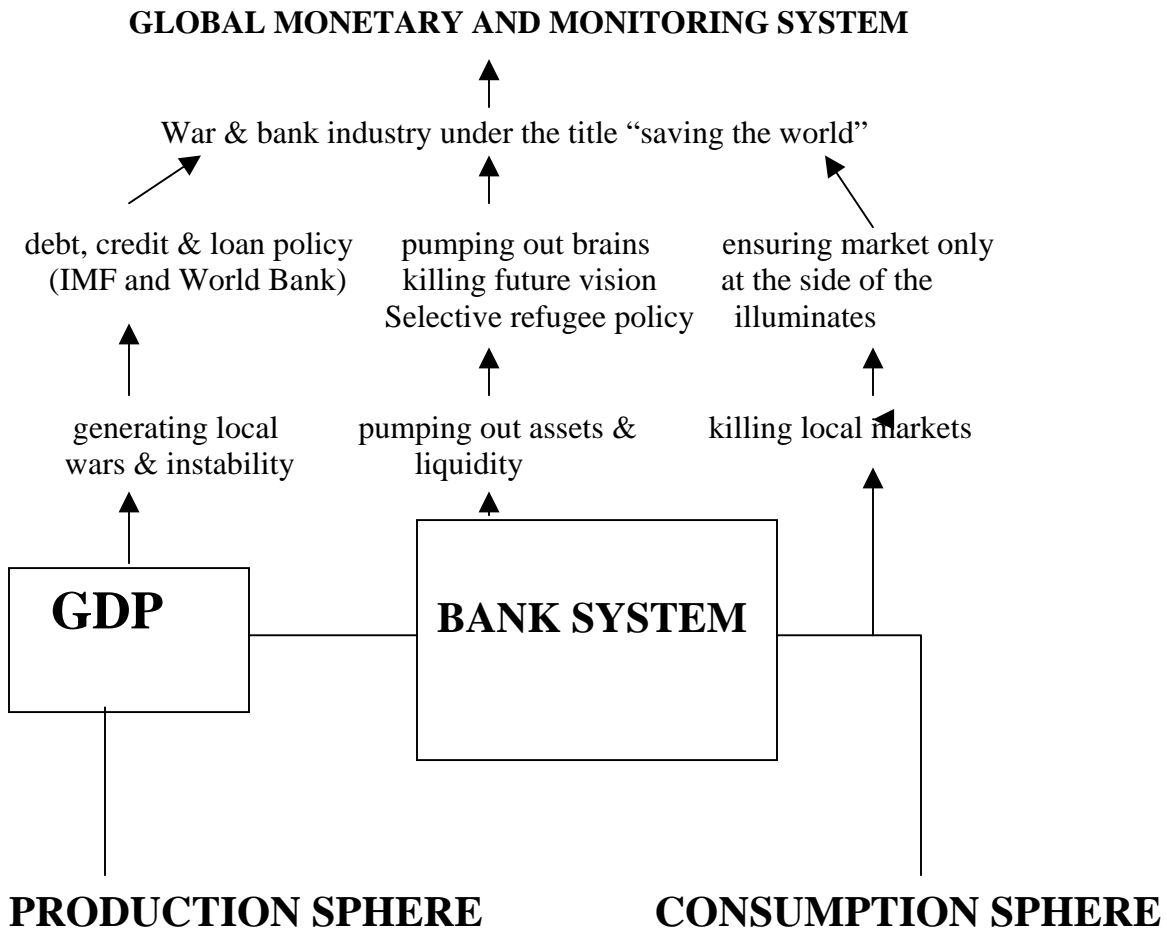

How these illuminates were formed and how do they work?

After robbing the world and using slave workers, some countries have become very rich and also after massacring the local aborigines they've established their own "democracies" and "human rights". The colonial system formally has been abolished. However the ex colonialists while were leaving their colonies were also decapitalizing the ex colonies. What does it mean? It is true that in the colonial times they established (for themselves) in Africa a road system and infrastructure and introduced the health-care and education at high level but after they left there was no capital any more to maintain these systems in fact they were installing "capital pumps" on the remaining economic. The subsequent black led governments have found themselves in a trap. They had to recognize the fact that instead of liberty there is a new slavery and colonization that is operated indirectly from outside and willingly or not but the new black leaders maintain it directly...

So these invisible groups out of the sight and above the nations are the illuminates. Another information... Money works in the economy like blood in the blood circulation...it is impossible that your blood only circulates in one part of your body while it does not circulate in the rest. Today the world has become small and the money has to circulate everywhere in an organized way as the owners of the money want. The "greediness" of the money caused wars in the late 1990's in the Arab Golf area and as a result even the money of the rich Arab states should circulate under the control of the

new world rulers. This greediness is the reason of the invasions against countries like Afghanistan or Iraq etc. But there is another war...a silent one but more cruel... This war is in Africa for the treasures of Africa...The huge “money circulation” needs to maintain activities what can guarantee and keep the value of the money in the required level...These activities are partly legitimates like maintaining flourishing economies but partly are non legitimates like creating wars in order to avoid recession in the economy and supplying the war industry or maintaining drug industry or to manipulate anti-human procedures to rob continents and get out their minerals and treasures. Without minerals like gold or diamond the illuminates would be paralysed. Your gold is the one what makes the US dollar firm and only you are the one who is not allowed to use it...Stop for a while and think...Now let’s have a look how the “pumps are working to make your continent more desperate...

Pumps of the Illuminates

## Killing local markets

We've mentioned this item previously. In case your economy is decapitalised there was no finance to maintain the local market. The illuminates know that with decapitalisation can be achieved more cruel influence than with war. After you've lost your own market you have to sell your own goods somewhere else where the price what you get will cover your expenditures... Your government is decapitalised and is not in a position to pay for you for your products. So what is the next step? You are stealing and smuggling your goods to a market what pays... Today you have a market in the Republic of South Africa (SA)... This is the only economy in the continent what is still working and it is the only hope to keep you alive... We all have to support the economy in SA... Without SA the whole continent will fall... Do you think the illuminates are happy for SA? No... they are not and will do their best to cause problems in the economical and political system of the country... Read the news and follow the events every day and you will find out what is happening in SA to keep the system working in the hand of the blacks... It's getting more difficult day by day...

And what will happen if the market in SA would fall? Disaster... you will have to give everything free of charge to those who will that time to ensure for you the only remaining market... and this will be the big globalised market ruled by the illuminates...

## Money and brain pumps

Your minerals and products that should guarantee the liquidity of your country are going to disappear. These goods are finding the way through local politicians or black market to pass away in a large scale... You my brother are smuggling also in order to survive but the quantity what you have can not be compared to the previous one... What is the result? If there was no covering asset and/or productivity in the economy what keeps your local money firm will start the endless inflation... Without those assets your banknote is only a piece of paper with no liquid value... And there is another result too... Those who can realize what is happening and they are the most educated people of your society are leaving... Having no future vision of life at home they leave for a country what accepts them after being selected... The administrative system of the illuminates are checking them and if they can use them they can stay if not then they will be deported or used as a third class human beings... And what do you think for what purpose they can use those persons whose brain is full of experiments and information? They use them for themselves but not for you...

Sierra Leone or in DRC and elsewhere in Africa the UN maintains different refugee camps... In these camps they "pull out" all information from your fellow black brother who is there to seek refuge from those who massacred his family or tribe. Do you know how many precious minerals are those UN officers collecting?

And what happens if you ask for an asylum? Do you have money or information? If not please don't try... And one more question... which tribe are you from? There are tribes which have priority due to their historical linkage with the previous colonial system... If you were coming from different tribe please give up... Now you can see... your dignity is not given to you in your own country and not in a foreign land... Nobody wants you... The most comfortable solution for them if you disappeared... Be a victim of a local war or HIV/AIDS or malaria... they will help you to die... don't wait...

## Debt & Credit Pump

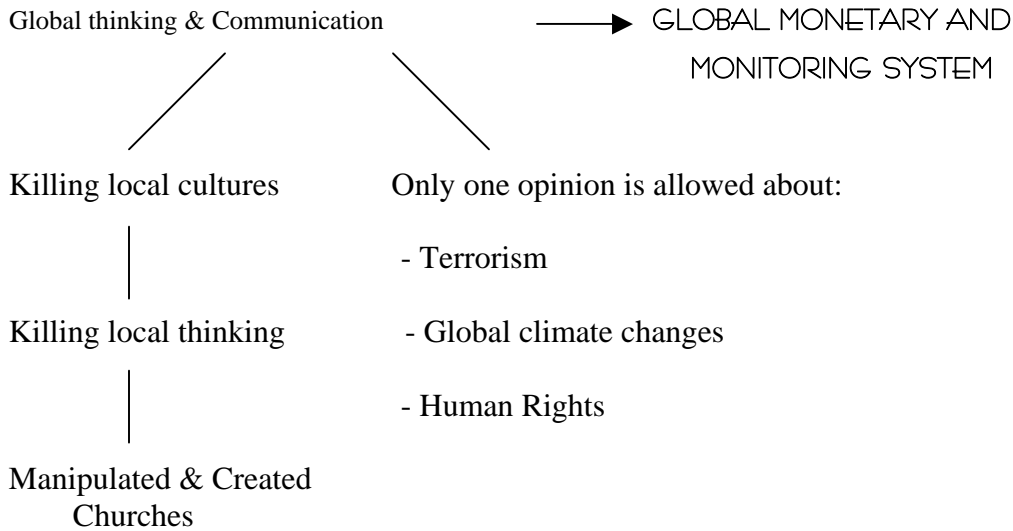

Your economy is down...The liquidity is down and the inflation is working...Your leaders are appealing for credits...But the credits are all traps...and your economy is getting into a chain reaction and is not able to get rid of the deficits and the losses of the budget. Previously the loans were obtained on bilateral base... that time states still were working...after the money system is being globalised you can get credit from the institutes of the illuminates (International Monetary Fund or World Bank). These credits are based on the usury system... and the usury system is based on the manipulation with the goods or the amount of the money on the market or the manipulation with the time. In the ancient ages there was no money. People were changing goods between themselves directly. The money entered into their relations to facilitate the transactions between buyer and seller in order to find each other quickly and to change their goods on an appropriate way. The system what is supporting this procedure is human and positive. But the system what puts a distance between buyer and seller and as an intermediation factor is going to become omnipotent and superior is an anti-human and negative system. This is how the credits are working today. The illuminates are causing a particular situation (poverty etc. see before)... as a result your leaders are appealing for credits from their institutes (IMF, WB) which are working artificially slowly being over administrated and over burdened with “water heads” ... and as a result even if you get something you should pay back the capital and the fee of the period what you were using...this is called interest rate or usury...yes... in the last thousands of years we debtors are paying for the time...so the illuminates are selling even the time to us... and we pay for it with gold... You are in a trap

## Local wars

What happens if your country is very important to everybody and all these economical weapons are not effective enough? Than starts a new chapter: generating local wars... After getting through the problems concerning survival it was impossible to maintain unity on your land. If you were not clever enough you find your fellow black is guilty for all you are suffering from. Even your ruler wants to prove that not he but an enemy is working against the sovereignty of his country. Everybody is looking for enemies. Without enemies today you cannot rule any country. The enemy can be another tribe or political party or a religious group... The enemy can be France or EU...but it is a mere communication...Nobody tells the truth...the enemy is the illuminates. They are generating this “enemy culture” and manipulating it with different means (see later). They are happy not to send troops to kill you...you can do it yourself...Stop for a while and think for a moment...If a car is kicking you don't be angry of the car but the driver...Let's search for the driver together... When your dead corps will cover your land they will send the “peace keepers” or the ones who are “saving the world”. These troops mainly consist of poor emigrants and citizens with hope for getting green card to the USA or gaining higher respect by the country of origin but they finally don't fight or die for their state...but for them... And starts the construction of the robbery system according to the “universal taste” giving no share to you...Stop...and you have to evaluate everything whatever have

happened with you as it was nice and positive...Why? Because they wash even your brain...how? See...

## Global thinking & Communication

## Terrorism

Who is the terrorist? Anybody who can see how this satanic system works and tries to do anything against it for the sake of the mankind is a terrorist...is the Columbian drug cartel terrorist? Not...even if they kill innocent people and are threatening political regimes and economies...are those terrorists who were launching the first atomic bombs to Hiroshima or Nagasaki? No...or the one's who invaded Vietnam? No...Perhaps those are the terrorists who are killing innocent Palestinians in refugee camps or were massacring children with cluster bombs in Lebanon...Not even them...Then who is the terrorist? Terrorist is e.g. Ben Laden and the Al Qa'ada...and those who caused the collapse of the WTC on the 11<sup>th</sup> of September 2000. But who are they? Myself I was acting Muslim leader between 988-1993 and was attending almost every Islamic Conference in Saudi Arabia and Iraq and Morocco etc. I have never heard about Ben Laden and Al Qa'ada and know not anyone who knows them. What are the facts? The fact is that the family of Ben Laden is an existing family and they have interest in the oil business like the Bush family...the fact is that after the 11<sup>th</sup> of September the illuminates could achieve to occupy countries like Afghanistan and Iraq to expand their interests in the region hiding everything under the slogan "war against terrorism".

Dear brother...do you think we Muslims are so stupid to do anything against our own interest? What strategic aim can be realized with an attempt like 11<sup>th</sup> of Sept. for us? Nonsense...Do you think that an attempt like this can be achieved by some foreigners? No...This attempt was based on the work of thousands of well organized professionals who were serving at local authorities...And also the fact is that since 11<sup>th</sup> of Sept. we Muslims have given up our self confidence and are scared...the world makes us feel that we are second class citizens here so in order to be tolerated we have to give up our

principals and dignity...Do you think that this is what we wanted? No...Today there are books full of evidences how the illuminates was working on that black day of 11<sup>th</sup> of Sept. We know what happened. And even today we don't know who is Ben Laden and which interest was he working for.

Be aware black brother...maybe you will be the next terrorist if you prevent those forces to rob your country...Don't listen to the different communications...Put together the facts and the truth will come out...

### Global Climatic Changes

Do you think that the communication on the global climatic changes is a small-scale issue? You are mistaken...This item is connected to the environmental protection and the carbon dioxide emission what is supposed to cause the green house effect and the global climatic changes... Do you know who is the responsible for all this changes? You...Just try to develop your industry...The emission of carbon dioxide of your country will be always above the acceptable level and you will be responsible for the melting icebergs and cyclones and floods...But those who were not signing the Kyoto agreement on the CO<sup>2</sup> emission and polluting the air with tons of carbon dioxide day by day and damaging the purity of the oceans are innocent...

What is the next step? Resolutions...and you have to give up the development plans of your industry and economy.

### Human Rights

What is moral today? Who is telling to us what is good or wrong? God? No...and what is good for them is bad for us...

After massacring local natives and using slaves a country was established...they issued the declaration of human rights what was valid for several years and was gaining the respect of the whole world...

What are the facts today? In the Biafra war (today Nigeria) was massacred two million persons...did the world stop this war? In Sudan also 2 million has died in the civil war between the central government and the southern forces and even recently thousands are dieing day by day in Darfor...What rights do they have? Do they have right to live with us in this Globe? No...they have to die...In Burundi 1.4 million mainly Tutsi was killed within two weeks by local Hutu people...what rights did those Tutsi people have? Only the right to die... And what about DRC where thousands are disappearing in the forests due to the war between the war lords in order to control the areas of gold and diamond... What about Somalia and Liberia and Sierra Leone and Ivory Cost etc? Most of the people in the world even don't hear about them...

And what happens if a British soldier is captured in Iran or a USA citizen is detained by the local authorities in Grenada or if there was blockage in the electric system of New York? We all in the world have to know about it and we all have to feel sorry and sympathy for them.

Who is feeling with us? Who is opening the eyes of the world about our every day struggles? How many of us are tortured or have their houses demolished or are injected instinctively by HIV/AIDS or are raped or have their legs or arms cut off? Who is representing them? Allah...God...Stop for a while and think...There is only one human right.

## Killing Local Cultures

Whoever inhabits today this world black or white or yellow has an African origin... All our mankind is originated from Africa...

This wandering African man has populated our planet and within hundreds of thousands of years has changed his colour and structure. We all are very proud to belong somewhere what makes us linking to each other. We all have our own language and customs and art ... so we all have our own cultures...Among all of these cultures the African is the most ancient and authentic...These tribal people had to fight with the nature every day...they had to cure themselves and they had to work out a codex of survival...They were expressing their feelings or their fight with demons in their musical and dancing world...every tribe in a particular way. All of them should be proud...because these codices of their living are still in force. In case we gave for these codices more importance a local chief could do much more for the reconciliation than the army....Do you think that everybody likes your culture? No...You can hide behind your culture and your people can cure you...Everything what is linking you to your people is against the interest of the new world rulers...If you go back to your tribe your people are slaughtering a goat or a sheep and you can speak and listen to them while you are sitting around the fire...What? Sitting and exchanging information about the world? Are you a terrorist? What language are you speaking? Is it your tribal language? You are really a terrorist...The good citizen of the new world order has no relation with people who can supply you with other information than the one is coming through the medias...The good citizen is buying a Cola and taking a hamburger and believes everything what these medias are casting...The good citizen is buying everything what is advertised there and accepting the superiority of the Big Invisible Brother who is putting your brain in a new form and shaping your thinking according to his wish...This is the new goodness...the illuminates...

After all...are you not scared to follow your own culture and speaking your own language? Are you not scared to be marked as a terrorist?

## Killing Local Thinking

Just try to think...your culture is a target to be destroyed. The interest of the new world order is to create individuals by exploring any linkage what makes you flocks...The individuals can be manipulated but flocks can not... What happens if some individual person starts to think and put together the facts about what is happening around them? This is a mere terrorism and the new form of blasphemy...you are a rebel against the new goddesses...Thinking is dangerous.

## Manipulated & Created Churches

Don't cry. The rulers of the new world order are caring about people and they know that you need a belief...Those old classical religions like Islam or Catholicism are not good enough even if these faiths were first propagated by slave hunters or colonialists...Their experts like psychologists and Etnographologists and Orientalists and thousands of other...logists are permanently studying you and as a result they create for you a religion like the tailor is sewing a dress... They know that you are black and you like the rhythm

and music...you like big cathartic feelings...your mind is not used to the logical thinking so sermons are not well composed but the feelings...the quoted texts from the Books are taken out from their context...you are not well educated and you can't control the credit of the quotations...and you are black who has come from a local culture where your tribe people were doing Juju...please here you are the new Juju...the miracle crusades...go there and dance and collapse and at the end may happen some earthly miracle...someone gets up from the paralyses and starts to run...the other gets back the sense of taste...the third one can hear again...miracles what you can never control true or not...

I am a white man... I want to be black...do you think they can do it for me? Do you think that Jesus (peace be upon him) was doing the same? Jesus went to the poor and hailed leprosy and blind in a humbled manner and was always saying it is not him but the Only God is the One Who is hailing...But we can see the new priests and apostles and anointed prophets of the new world order after being educated in the institutes of the illuminates wearing the most expensive suits acc. to Christian Dior or Pierre Cardein standard preaching and singing for millions exactly the way how the masses want to hear the "eternal truth". If they could really hail people why are they not visiting hospitals or suburbs where poor are residing? The truth is never popular because the truth is hurting the feeling...No prophet was popular in his age (with the exception of Muhammad PBUH). But these newly anointed prophets are popular because that popularity is "manufactured" for them after the spirits of human beings were surveyed and engineered in order to establish new churches to drive people out of the old ones. Do you know whom these new apostles are working for? Do you know where their boundless finance and luxurious exhibition is coming from? Do you know what this popularity are they using for? Yes...don't be a terrorist...be humbled and obey for them...Jesus loves you Alleluia...Jesus loves you Alleluia...and at the mean time the new goddesses are taking away everything what you have even your soul... This is the church business...

Question:

Have you ever seen a picture about Jesus where he was not white? (Jesus was Middle Eastern type) Why? What do you think what is the miracle? Is it a miracle to get back the sense of smell or in fact creating the heavens and the earth and the worlds and the life and the plants and the animals and the human beings? If you know the answer take a look out of the window and the clear evidences of the true miracles will be in front of you...

What about us Muslims?

We have also supplied you with fake people...how did Islam enter into the lands of the blacks? Partly by caravan traders but the majority was coming as slave hunters...Yes...Once we have to confess what we have done...we were hunting for blacks and we said it was our Jihad...In order to purify Islam from this shame we have to ask the repentance of Allah for what we have done against you and I hope one day our people will feel the necessity to compensate you as it is ordained for them...

We are not free of mistakes even today...In the late 1980's and 90's numerous Islamic organizations and individuals were establishing mosques and centres in Africa...Allah knows their intention why they did it...Was it really for saving souls and guiding them to the right way or it was a competition with other religious missions in the free zone of the church business? This was the time when different Muslim formations could get abundant finance from Muslims in the Middle East in the hope of spending it for the way

of Allah...However this money partly was converted into capital to start their business and raised them in a position to buy mines and factories and shops...This was also the capital what helped for them to become the rulers of the black markets. Even if they were wearing nice long beards and Islamic dresses and their wives were veiled etc. nothing can legalize their activity acc. to Islam nor secularly. They treat their black employees even if they were Muslims like slaves...Allah is the Best Knower what they did and do...and their reward is coming.

What about the Arab capital on the Middle East? Today the majority of the Arab capital is not free and even if there was good intention to spend a part of it on the way of Allah the finance is missing. The Arab capital is circulating together with the capital of the illuminates and it's under control.

This analysis is not complete without exposing other churches like Roman Catholic or Baptist etc. In my capacity as the servant of Islam and Africa have no right to interfere into their internal affaires. But time should come for all of us to confess what we have done in this continent and what should be done...

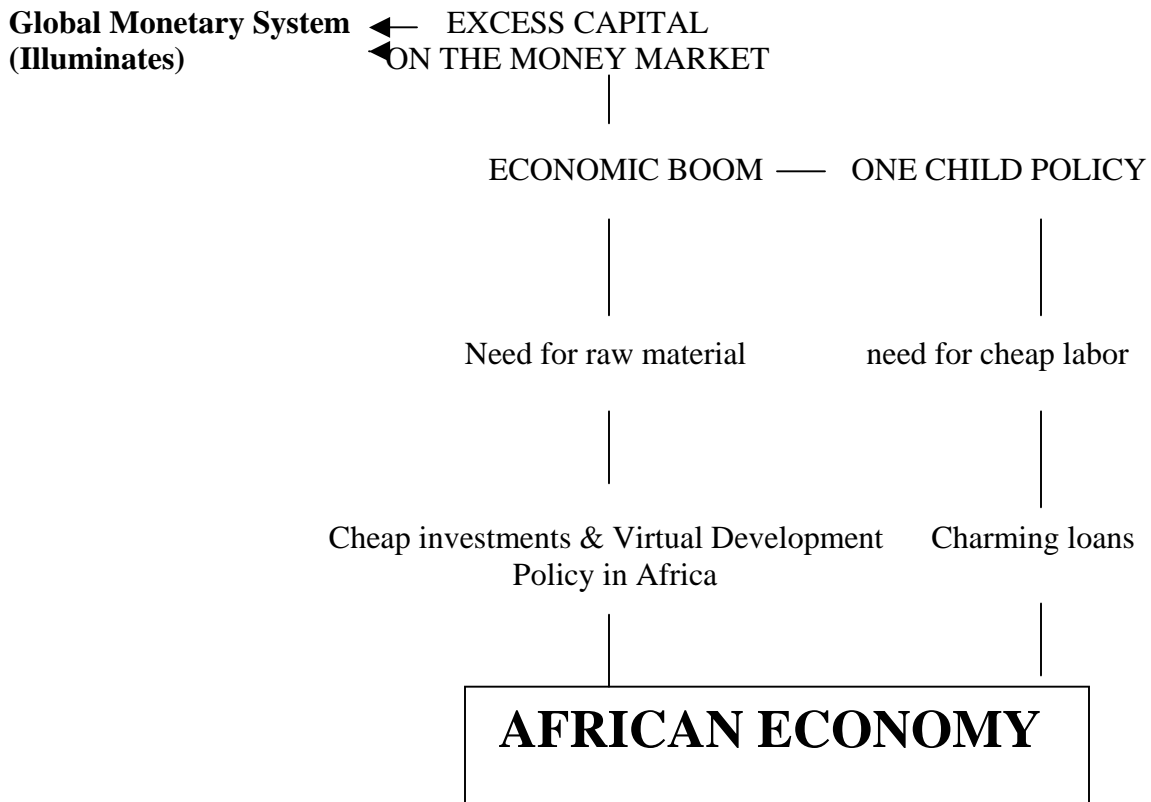

Poor people...everyone is going to rule you...illuminates or secular rulers or religious leaders as a whole. In order to rule you they force on you their small scale human dimensions...but these dimensions are so narrow for you and as a result you have to transgress their desperate rules...But God has laid down for you His Eternal dimensions...and He is the One Who created you...so it is on you to take the decision where to belong to...Humble yourself and serve the truth together with us...

The new world communication and churches don't allow for you to learn the Truth...They support the new war and banking industry. They are creating new friends and new enemies in order to save the world from you if you were a thinking human being. They monitor and manipulate all of us.

This was only one side of the story...What about China and the Eastern approach?  
Coming...

### III. PART TWO: EASTERN APPROACH

#### Eastern Approach

In the international communication the emerging Chinese economy is considered as one what represents a counter pole to the western economy. It is not true...They are not counter poles but supplement each other on the expense of those countries which are feeding them with row materials and cheap labour. Details...

#### Cheap Investment & Virtual Development Policy

China has no row materials so it is evitable to get it from somewhere. The prices on the market are high so the best solution is to have its own mines and basic processing activities in the countries where the row materials are abundantly available.

Please brothers don't believe in the true partnerships and friendships. In the markets and on the scene of the politics friendship doesn't exist but interest. So our Chinese partners are coming and privatising mines and factories and agricultural projects. We are happy and we expect that life will change. Our Asian brothers are not investing too much capital in these activities but taking away everything what they can. The security levels of the

mines are low and hundreds are dieing due to the odd systems still in use. At the mean time they are using the roads and the infrastructure and the cheap labour. In Zambia, Copperbelt area you can see how these mines are working.

You can find everywhere low quality Chinese goods what they pour to Africa. These fake goods are partly made in China and partly are confiscated by their authorities from pirates who are still active on their territorial waters. They use this staff to conquer markets in Africa. That is why these products are so cheap. However Africa is paying big price...as a result everything is converted into hard row materials and leaving the continent.

### One child policy

China has 1.5 billion citizens. In order to stop the growth of the population there are several measures taken to limit the numbers of the children in the Chinese society. The “one child” families can enjoy some advantage above those where the number is two or more. Most of the families have only one child. What will be the result on a long term? The result comes after 15-20 years when these children will be grown up and will represent the active labour class in China. In other words after 15-20 years the Chinese society will be old and only 20-30% of the population will be active the rest will be children or mainly old. China is preparing for this period and needs you as active labour. Your cheap labour in Africa can solve the rising social problem in China...Take care... a new slavery is coming even from the East!

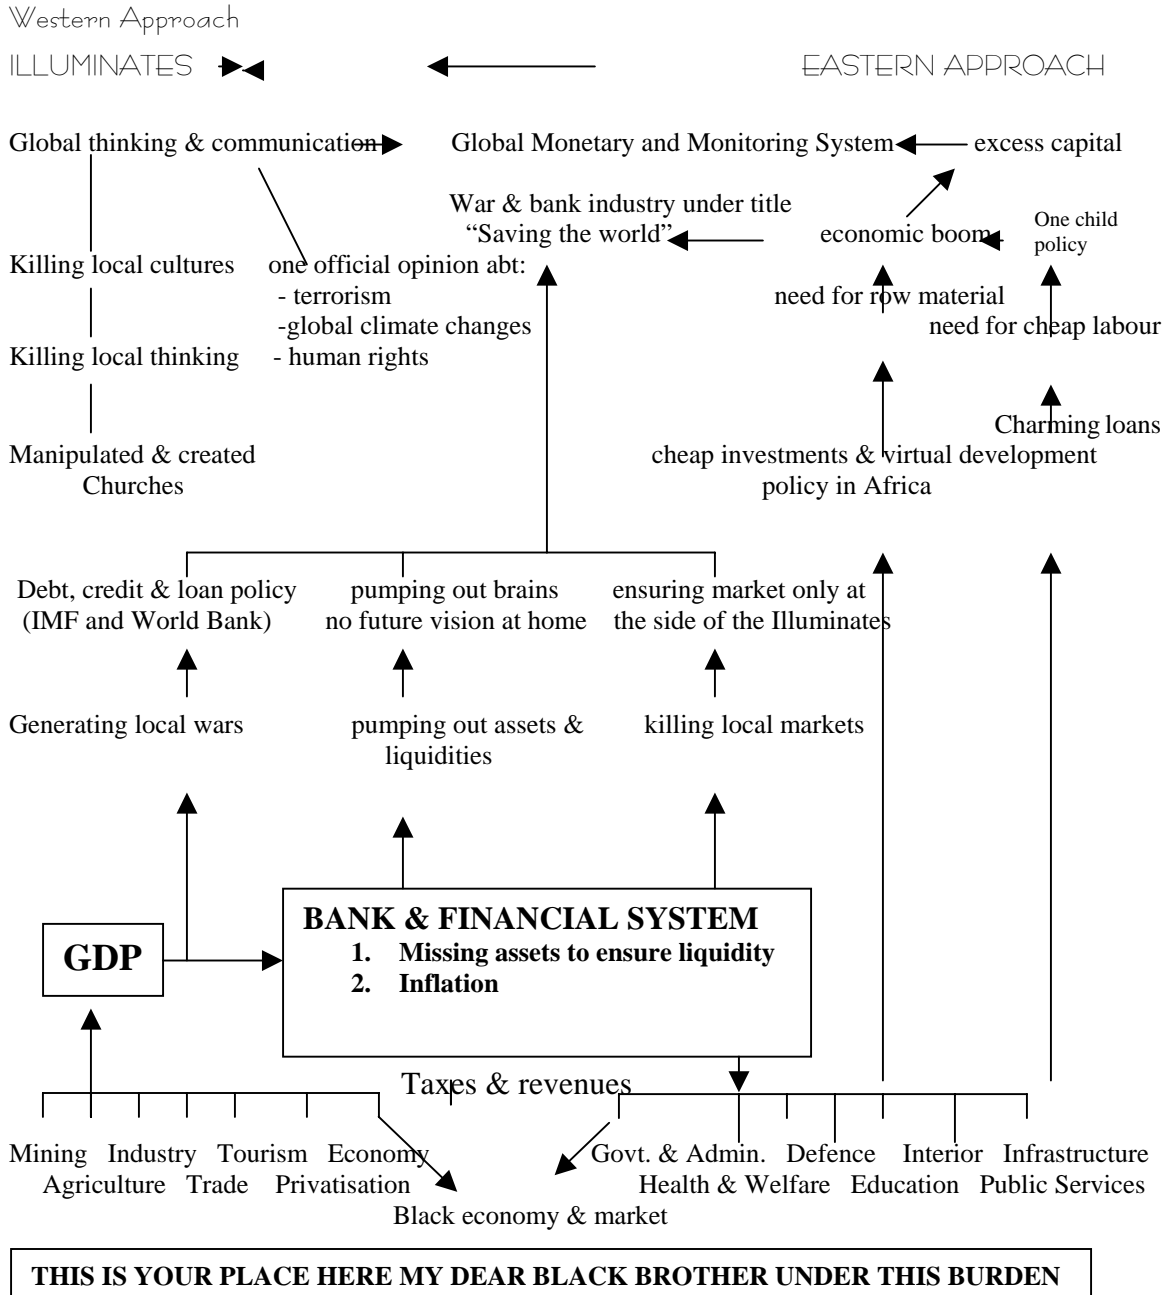

### Economic Boom

What happens if the economy is well organized and gets cheap row materials and cheap labour? It is only matter of the time and the economy starts to grow and the previously underdeveloped country becomes an economically developed giant where the chain reaction is starting to work acc. to the same logics as the circulation of the money works at the case of the global banking. However here not the hunger for money is increasing day by day but what is increasing is the hunger for new and bigger quantities of row materials. And the economy is growing even more...after the light industry starts the heavy industry like the production of vehicles and tools and machineries and everything demand new markets. What is the result? The result is a huge positive balance in the economy and a huge capital what is waiting for reinvestment but where? This giant excess of capital cannot be driven back entirely to the Chinese economy because it could cause a drop on the balance between the consumption and production. Just imagine what can happen if from one day to another 1.5 billion men start to purchase goods without limits as a society of consumption on the West? If they start do it nobody could control the social consequences and whatever can happen. So they put back only part of the money to the economy and the growth of the society remains under control.

The other part of the money appears in a form of cheap loans in Africa again to strengthen the Chinese presence and investments...in these days China offered 5 billion USD for the countries of the African continent as a governmental loan. If you accept it you will have to pay for them back much more... even your life.

However there is still the third part of the surplus Chinese capital and this is what is not invested in China and not given to Africa...Where is this huge money is going? This money appears on the international money market in a form of credits or loans and is

joining to the globalised bank system. Maybe the credit what your country gets from the IMF or WB has Chinese origin...and all of them are earning on your expense. At the end the globalised bank system reaches its position of these days when it is eating every capital in the world and this universal capital can circulate only under the control and approval of the illuminates. Here and now the circles are closed. Now please take a look again to the complete map:

Can you see? Every economical giant let it be Western or Eastern is feeding from you Africa...Is it not enough your own problem? You are keeping alive your own parasites inside and outside...You are giving value to the hard currencies of the world and standing behind the big economical booms with your minerals and raw materials...

Hey there... People of the tribes... Mandinkas and Fulanis and Akans and Ashanties and Yorubas and Housas and Igbos and Jaalis and Danakilas and Naweers and Shuluks and Dinkas and Lingalas and Kasais and Chilubas and Lomes and Swahilis and Bembas and Lembas and Nyanjas and Tongas and Shonas and Ndebeles and Tswanas and Zulus and Xosas and Shotos and everybody over there. Is it a question that who belongs to which tribe or faith any more? The real problem is the burden of the world on your shoulder! Not you are the one who commit sins because your sins are generated from somewhere else. You are only going to survive. The real criminals are those who strengthen your "slave reflexes". And what they give for you? Disgrace and the right to die...You have never wanted anyone to suffer or to have damages or to die for your favor and you will not want like that even in the future.

Our life cannot be the priority for us but our children's life.

Maybe together we can do something. We are not alone...

"If I live I want to know why I live for and if I die I want to know why I die for"
